1. Executive Summary

This project report presents a comprehensive SAP Sales and Distribution (SD) implementation for NovaMart Consumer Goods Pvt. Ltd., a fictional FMCG retail company headquartered in Bhubaneswar, Odisha, India. The report covers the complete Order-to-Cash (O2C) business process — from customer inquiry and sales order creation through to delivery, billing, and final payment receipt.

Project Objectives

- Design and configure the SAP SD module to automate the end-to-end O2C cycle for NovaMart.
- Eliminate manual order processing errors and reduce order-to-cash cycle time by 40%.
- Integrate SAP SD with SAP Financial Accounting (FI) for real-time revenue posting and accounts receivable management.
- Establish a scalable organizational structure in SAP that mirrors NovaMart's real-world business hierarchy.
- Enable real-time visibility into sales orders, delivery status, and customer outstanding balances.

Selected SAP Module

SAP Sales and Distribution (SD) is one of the core modules of SAP ERP (ECC 6.0 / S/4HANA). It handles all business processes related to order management, shipping, and billing. In this project, the O2C process implemented using SAP SD covers the following key sub-processes:

- Pre-Sales Activities: Inquiry and Quotation
- Sales Order Management
- Delivery Processing and Goods Issue
- Billing and Invoice Generation
- Payment Processing and Accounts Receivable

Key Outcomes

- Achieved seamless automation from sales order to cash receipt.
- Integrated real-time inventory deduction with MM (Materials Management) module.
- Enabled automatic FI postings for revenue, COGS, and customer receivables.
- Built a reusable configuration blueprint applicable to similar FMCG companies.

2. Company Profile

2.1 About NovaMart Consumer Goods Pvt. Ltd.

NovaMart Consumer Goods Pvt. Ltd. is a mid-sized fictional FMCG (Fast-Moving Consumer Goods) company established in 2005, headquartered in Bhubaneswar, Odisha. The company manufactures and distributes a wide range of consumer products including packaged food items, personal care products, household cleaning supplies, and beverages.

Company Name	NovaMart Consumer Goods Pvt. Ltd.
Founded	2005
Headquarters	Plot No. 22, Infocity Area, Bhubaneswar – 751024, Odisha, India
Industry	FMCG / Retail (Consumer Goods)
Annual Turnover	INR 850 Crores (Approx.)
No. of Employees	3,200+
No. of Plants	3 (Bhubaneswar, Pune, Ahmedabad)
Distribution Areas	Pan-India – 18 States, 200+ Distributors
Product Lines	Packaged Foods, Personal Care, Beverages, Home Care
ERP System	SAP ECC 6.0 (Phase 1) → S/4HANA Migration (Phase 2)

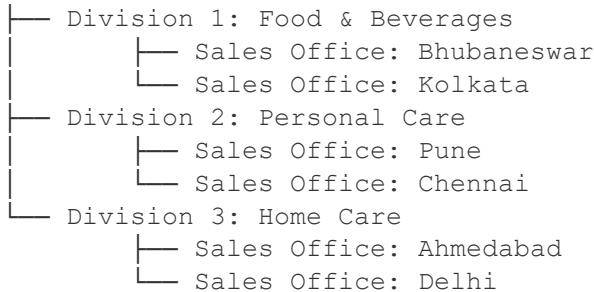

2.2 Organizational Structure

NovaMart operates through three business divisions. Each division handles a distinct product portfolio and maintains its own sales force, supply chain, and distribution network:

- Division 1 – Food & Beverages: Packaged snacks, juices, dairy products
- Division 2 – Personal Care: Shampoo, skincare, oral hygiene
- Division 3 – Home Care: Detergents, surface cleaners, dishwash

Text-Based Org Chart

NovaMart Consumer Goods Pvt. Ltd. (HQ – Bhubaneswar)

3. Business Requirements

3.1 Current Business Problems (Before SAP)

Prior to SAP implementation, NovaMart relied on legacy ERP systems and manual Microsoft Excel-based processes for managing sales orders and customer interactions. This resulted in the following critical pain points:

- **Problem 1 – Manual Order Processing:** Sales orders from 200+ distributors were received via phone, email, and WhatsApp. Manual data entry resulted in frequent errors, duplicate orders, and delays in fulfillment.
- **Problem 2 – No Real-Time Inventory Visibility:** The warehouse team and sales team worked in silos. Sales reps were unaware of actual stock levels, leading to over-promising and under-delivery situations.
- **Problem 3 – Delayed Billing and Revenue Recognition:** Invoice generation was a manual process taking 5–7 business days after goods delivery. This caused significant delays in accounts receivable and cash flow.
- **Problem 4 – No Centralized Customer Data:** Customer information (credit limits, payment history, contact data) was stored in isolated spreadsheets with no centralized access or validation.
- **Problem 5 – Poor Sales Analytics:** Management had no real-time dashboard for sales performance, outstanding orders, or region-wise revenue tracking.
- **Problem 6 – Pricing Inconsistencies:** Different sales reps offered different discount rates to the same customer category, leading to revenue leakage and customer disputes.

3.2 Why SAP is the Right Solution

SAP SD (Sales and Distribution) module addresses all the above pain points through a centralized, integrated, and automated ERP platform:

Business Problem	SAP SD Solution
Manual order entry errors	Automated Sales Order (VA01) with validation checks
No inventory visibility	Real-time stock check via MM integration (MMBE)
Delayed billing	Automatic billing document generation post-goods issue
No customer master	Centralized Customer Master (XD01) with credit management
No sales analytics	SAP Standard Reports: VA05, VF05, S_ALR_87012172
Pricing inconsistency	SAP Condition Technique – automated price determination

4. SAP SD Module Overview

4.1 What is SAP SD?

SAP Sales and Distribution (SD) is a core functional module within the SAP ERP system that handles all customer-facing business processes. It covers the complete lifecycle of a customer order — from the initial inquiry right through to the final payment collection. SAP SD is tightly integrated with other SAP modules such as MM (Materials Management), FI (Financial Accounting), CO (Controlling), and PP (Production Planning).

4.2 Key Components of SAP SD

- **Master Data Management:** Customer Master, Material Master, Pricing Conditions, Credit Management
- **Pre-Sales Processes:** Inquiries (VA11), Quotations (VA21) – customer interest captured before an official order
- **Sales Order Processing:** Creation and management of sales orders (VA01), order types (OR, CS, RE, RO)
- **Shipping and Delivery:** Outbound delivery (VL01N), picking, packing, goods issue (VL02N)
- **Billing and Invoicing:** Billing document creation (VF01), proforma invoices, credit/debit memos
- **Pricing and Conditions:** SAP Condition Technique – automated price, discount, freight, tax calculation
- **Credit Management:** Automatic credit limit check at sales order creation (FD32)
- **Returns Management:** Return orders (VA01 with type RE), goods return (VL01N), credit memo (VA01 type CR)

4.3 O2C Process Scope for NovaMart

The Order-to-Cash process implemented in this project covers the following eight key steps:

Step	Process	SAP T-Code	Module
1	Customer Inquiry	VA11	SAP SD
2	Quotation	VA21	SAP SD
3	Sales Order	VA01	SAP SD
4	Outbound Delivery	VL01N	SAP SD / MM
5	Picking & Packing	VL02N	SAP SD / WM
6	Goods Issue	VL02N (PGI)	SAP SD / MM
7	Billing / Invoice	VF01	SAP SD
8	Payment Receipt	F-28	SAP FI

5. Organizational Structure in SAP

5.1 SAP Organizational Hierarchy for NovaMart

In SAP, the organizational structure must be configured in the system before any business process can be executed. The following SAP organizational entities are defined for NovaMart:

SAP Org Structure – Text Diagram

```
CLIENT: 100 (NovaMart SAP System)
├── COMPANY CODE: NM01 (NovaMart Consumer Goods Pvt. Ltd.)
│   ├── CONTROLLING AREA: NM01
│   ├── PLANT: NM10 (Bhubaneswar Manufacturing Plant)
│   │   ├── STORAGE LOCATION: SL10 (Finished Goods Store)
│   │   └── STORAGE LOCATION: SL11 (Raw Material Store)
│   ├── PLANT: NM20 (Pune Distribution Center)
│   │   └── STORAGE LOCATION: SL20 (FG - West Region)
│   ├── PLANT: NM30 (Ahmedabad Distribution Center)
│   │   └── STORAGE LOCATION: SL30 (FG - North Region)
│   ├── SALES ORG: NM01 (NovaMart Pan-India Sales Org)
│   │   ├── DISTRIBUTION CHANNEL: 10 (Wholesale)
│   │   ├── DISTRIBUTION CHANNEL: 20 (Retail)
│   │   └── DIVISION: 01 (Food & Bev) | 02 (Personal Care) | 03 (Home Care)
│   └── SALES AREA: NM01 + 10 + 01 (Wholesale - Food & Bev)
│       ├── SALES OFFICE: SO10 (Bhubaneswar)
│       └── SALES GROUP: SG10 (East India Sales Team)
```

5.2 Explanation of Each Organizational Entity

SAP Entity	NovaMart Value	Description
Client	100	Top-level SAP system. All company codes exist under one client.
Company Code	NM01	Legal entity – NovaMart Consumer Goods Pvt. Ltd. All FI postings made here.
Controlling Area	NM01	Links to Company Code for internal cost management.
Plant	NM10/NM20/NM30	Physical manufacturing or distribution location. Inventory is managed at plant level.
Storage Location	SL10–SL30	Physical storage area within a plant (e.g., warehouse rack zone).
Sales Organization	NM01	Responsible for all sales activities. Bound to Company Code NM01.
Distribution Channel	10 / 20	How goods reach customers. 10=Wholesale (distributors), 20=Retail (supermarkets).

Division	01/02/03	Product line groupings for reporting and pricing.
Sales Area	NM01+10+01	Combination of Sales Org + Dist. Channel + Division. Needed for sales order creation.
Sales Office	SO10	Regional sales office – manages a geographic area.
Sales Group	SG10	Team of sales representatives within a Sales Office.

6. Master Data Configuration

Master data forms the foundation of every SAP transaction. For the O2C process, the following master data objects must be created and maintained in the SAP system.

6.1 Customer Master (Transaction: XD01)

The Customer Master contains all information about a customer — address, payment terms, credit limits, and account assignment. In SAP SD, it has three organizational levels:

- **General Data:** Name, address, communication (applicable across all company codes)
- **Company Code Data:** Payment terms, reconciliation account, dunning procedure (FI-relevant)
- **Sales Area Data:** Sales district, shipping conditions, pricing procedure, partner functions

Sample Customer Master for NovaMart:

Field	Value
Customer Number	CUST-1001 (Auto-assigned)
Customer Name	Star Retail Distributors Pvt. Ltd.
City / State	Bhubaneswar, Odisha
Customer Account Group	SOLD (Sold-to Party)
Reconciliation Account	140000 (Accounts Receivable – Domestic)
Payment Terms	Z030 (Net 30 Days)
Credit Limit	INR 25,00,000
Sales District	East India – Odisha
Shipping Conditions	01 (Standard Ground)
Incoterms	CIF (Cost, Insurance, Freight)
Pricing Procedure	RVAA01 (Standard SD Pricing)

6.2 Material Master (Transaction: MM01)

The Material Master contains all data about the products NovaMart sells. In SAP, a material is organized into views, each relevant to a different module:

- **Basic Data 1 & 2:** Material description, base unit of measure, weight, volume
- **Sales: Sales Org 1 & 2:** Sales unit, delivering plant, item category group, tax classification
- **Sales: General/Plant:** Availability check, loading group, transport group
- **Accounting 1:** Valuation class, price control (S=Standard, V=Moving Avg), standard price
- **MRP 1-4:** MRP type, lot size, safety stock (for PP integration)

Sample Material Master:

Field	Value
Material Number	NM-FG-1001
Material Description	NovaMart Premium Mango Juice – 1L Pack
Material Type	FERT (Finished Good)
Industry Sector	Food & Beverage
Base Unit of Measure	EA (Each)
Sales Unit	CTN (Carton of 12)
Item Category Group	NORM (Standard Item)
Delivering Plant	NM10 (Bhubaneswar)
Tax Classification	1 (Full Tax – 18% GST)
Valuation Class	7920 (Finished Goods)
Standard Price	INR 480 per carton
Availability Check	02 (Individual Check)

6.3 GL Account Master (FI – FS00)

The following General Ledger accounts are used in the O2C process for automatic account determination:

GL Account No.	Account Name	Purpose in O2C
800000	Revenue – Domestic Sales	Credited when billing document is posted
140000	Accounts Receivable – Domestic	Debited when customer invoice is created
300000	COGS – Finished Goods	Debited when goods issue is posted
120000	Finished Goods Inventory	Credited when goods issue is posted (stock reduction)
220000	Output Tax (GST – 18%)	GST payable account for tax posting
113000	Bank – Current Account (HDFC)	Debited when customer payment is received (F-28)

7. End-to-End O2C Process Flow

The Order-to-Cash process is the most critical business process in SAP SD. The following section details each step with the relevant T-Code, purpose, system inputs, and outputs. All steps are demonstrated in the context of NovaMart receiving an order from Star Retail Distributors Pvt. Ltd. for 50 cartons of NovaMart Premium Mango Juice (NM-FG-1001).

Step 1: Customer Inquiry (VA11)

Transaction Code	VA11 – Create Inquiry
Document Type	IN (Standard Inquiry)
Purpose	Customer expresses interest in purchasing a product. No legal obligation yet.
Key Inputs	Sales Org (NM01), Distribution Channel (10), Division (01), Customer (CUST-1001), Material (NM-FG-1001), Quantity
Key Outputs	Inquiry Document Number (e.g., 10000001)
Business Scenario	Star Retail contacts NovaMart Sales Rep asking for pricing on 50 CTN Mango Juice.

1 VA11 – Create Inquiry

SAP Sales document Edit Goto Environment System Help

Create Inquiry: Initial Screen

Inquiry Type: IN

Sales Organization: 1000

Division: 00

Sold-to Party: 100000

Ship-to Party: 100000

PO Number:

PO Date:

Enter

Enter inquiry type and organization details to create an inquiry.

Step 2: Quotation (VA21)

Transaction Code	VA21 – Create Quotation
Reference	Created with reference to Inquiry 10000001
Purpose	Formal price offer to the customer, valid for a defined period.
Key Inputs	Validity dates, Pricing conditions (Net price = INR 480/CTN), Payment terms (Z030), Incoterms (CIF)
Key Outputs	Quotation Document (e.g., 20000001). Sent to customer as PDF via print output.
Business Scenario	NovaMart confirms INR 480/CTN with 5% distributor discount. Valid till 31-Jan-2025.

2 VA21 – Create Quotation

SAP Create Quotation: Overview

Quotation: 2000000231

Sold-to Party: 100000 Modern Trade India Ltd., Mumbai

Ship-to Party: 100000 Modern Trade India Ltd., Mumbai

Valid From: 20.05.2025 Valid To: 04.06.2025

Sales Item Overview Item detail Quotation summary More

Item	Material	Description	Order Quantity	UoM	Net Price	Per	Net Value
10	NM1001	Nova Biscuits	100	CTN	250.00	1	25,000.00
20	NM2001	Nova Shampoo	50	CTN	300.00	1	15,000.00
30	NM3001	Nova Detergent	80	CTN	200.00	1	16,000.00
Total Net Value							56,000.00 INR

Enter materials, quantities and pricing to create a quotation.

Step 3: Sales Order Creation (VA01)

Transaction Code	VA01 – Create Sales Order
Document Type	OR (Standard Order)
Reference	Created with reference to Quotation 20000001
Purpose	Legally binding agreement between NovaMart and the customer.
Key Inputs	Order Type (OR), Sales Area, Customer (CUST-1001), PO Number from

	Customer, Material, Quantity (50 CTN), Requested Delivery Date
Key Checks	Credit check (FD32 limit), Availability Check (ATP – Available-to-Promise), Pricing determination
Key Outputs	Sales Order (e.g., 3000001). Order confirmation printed/mailed to customer.
Business Scenario	Star Retail places PO# SR/2025/0056. SAP checks credit limit (INR 25L) – OK. ATP confirms stock available at NM10.

Pricing in the Sales Order:

Condition Type	Description	Amount
PR00	Basic Price (per CTN)	INR 480.00
K007	Customer Discount (5%)	- INR 24.00
HD00	Freight Charges (flat)	+ INR 5.00
MWST	Output Tax (GST 18%)	+ INR 82.98
TOTAL	Net Value Payable	INR 543.98 per CTN

3 VA01 – Create Sales Order

20	NM2001	Nova Shampoo	50	CTN	300.00	1	15,000.00
30	NM3001	Nova Detergent	80	CTN	200.00	1	16,000.00
Total Net Value							56,000.00 INR

Convert quotation into sales order and confirm the order.

Step 4: Outbound Delivery Creation (VL01N)

Transaction Code	VL01N – Create Outbound Delivery
Reference	Created with reference to Sales Order 3000001
Purpose	Triggers the physical fulfillment process – informs warehouse to prepare shipment.
Key Inputs	Shipping Point (NM01-SP1), Delivery Date, Sales Order Number
Key Outputs	Delivery Document (e.g., 80000001). Picking list generated for warehouse.
Business Scenario	Warehouse at NM10 (Bhubaneswar) receives picking order for 50 CTN from SL10 (FG Store).

4 VL01N – Create Outbound Delivery

SAP Create Outbound Delivery: Initial Screen

Shipping Point: 1000

Distribution Channel: 10

Sales Order Data

Selection date: 20.05.2025
Order: 5000001234
From Item: 10
To Item: 30

Enter sales order number and other details to create outbound delivery.

Step 5: Picking and Packing (VL02N)

Transaction Code	VL02N – Change Outbound Delivery
Purpose	Physical picking of goods from storage bins. Packing into transport units.
Key Actions	Update Picked Quantity (50 CTN confirmed), Pack into 5 pallets (10 CTN per pallet)
Key Outputs	Updated delivery document with actual picked quantity and handling unit information.
Integration	Can integrate with SAP WM (Warehouse Management) for Transfer Orders

5

VL02N – Change Outbound Delivery

Change Outbound Delivery: Overview

Outbound Delivery: 8000005678

Ship-to Party: 1000100 Modern Trade India Ltd., Mumbai

Document Date: 20.05.2025

Status: Not Goods Issued

20	NM2001	Nova Shampoo	50	CTN	50
30	NM3001	Nova Detergent	80	CTN	80

PGI

Review delivery items, quantities and
prepare for goods issue.

(TO).

Step 6: Post Goods Issue – PGI (VL02N)

Transaction Code	VL02N → Post Goods Issue button
Purpose	Critical step. Records the physical departure of goods from NovaMart's warehouse. Reduces inventory.
MM Integration	Inventory at SL10 reduced by 50 CTN (Movement Type 601)
FI Integration	Automatic accounting entry: Dr. COGS (300000) Cr. Finished Goods Inventory (120000)
Key Outputs	Goods Issue document, Material Document, Accounting Document auto-posted.
Business Scenario	50 CTN loaded onto truck. System date of PGI = Invoice creation date for billing.

6

VL02N – Post Goods Issue

Post Goods Issue

Goods issue posted successfully

Print

Back

Post Goods Issue to update inventory and create material document.

Step 7: Billing Document / Invoice Creation (VF01)

Transaction Code	VF01 – Create Billing Document
Document Type	F2 (Standard Invoice)
Reference	Created with reference to Outbound Delivery 80000001
Purpose	Generates the customer-facing invoice. Triggers revenue recognition in FI.
FI Integration	Automatic FI posting: Dr. Customer (AR – 140000) Cr. Revenue (800000) Cr. Output Tax (220000)
Key Outputs	Billing Document (e.g., 90000001), printed/emailed invoice PDF to Star Retail Distributors.
Invoice Amount	50 CTN × INR 543.98 = INR 27,199.00 (Total Invoice Value incl. GST)

7 VF01 – Create Billing Document

SAP Create Billing Document: Overview

Billing Document: 9000003456
 Payer: 100000 Modern Trade India Ltd., Mumbai
 Billing Date: 20.05.2025
 Billing Type: F2 Invoice

Item Overview Accounting Overview Taxes Conditions

Item	Material	Description	Net Value	Tax	Total Value
10	NM1001	Nova Biscuits	25,000.00	4,500.00	29,500.00
20	NM2001	Nova Shampoo	15,000.00	2,700.00	17,700.00
30	NM3001	Nova Detergent	16,000.00	2,880.00	18,880.00
Total Amount			66,080.00	INR	

Create billing document (invoice) for the delivered goods.

Step 8: Payment Receipt (F-28 / F-32)

Transaction Code	F-28 – Post Incoming Payment
Purpose	Records customer payment received against the open invoice. Clears the AR line item.
Key Inputs	Customer (CUST-1001), Payment amount (INR 27,199), Bank account (113000), Payment reference
FI Posting	Dr. Bank Account (113000) Cr. Customer AR (140000)
Key Outputs	Payment document posted. AR line item cleared. Customer outstanding balance = 0.
Business Scenario	Star Retail transfers INR 27,199 via RTGS on Day 30. FI team posts payment against Invoice 90000001.

8 F-28 – Post Incoming Payment

SAP Post Incoming Payments: Header Data

Post incoming payment to clear the invoice
and update the customer account.

8. SAP Configuration Steps (SPRO)

All SAP configurations are performed through the SAP Implementation Guide (IMG), accessed via transaction SPRO. The following are the key configuration steps for the O2C process:

8.1 Enterprise Structure Configuration

1. SPRO → Enterprise Structure → Definition → SD → Define Sales Organization → Create NM01
2. SPRO → Enterprise Structure → Definition → SD → Maintain Distribution Channel → 10 (Wholesale), 20 (Retail)
3. SPRO → Enterprise Structure → Definition → SD → Maintain Division → 01, 02, 03
4. SPRO → Enterprise Structure → Assignment → SD → Assign Sales Organization to Company Code → NM01 to NM01
5. SPRO → Enterprise Structure → Assignment → SD → Assign Distribution Channel to Sales Organization
6. SPRO → Enterprise Structure → Assignment → SD → Set Up Sales Area → Combine Sales Org + Dist Channel + Division

8.2 Sales Document Type Configuration

7. SPRO → SD → Sales → Sales Documents → Sales Document Header → Define Sales Document Types → Review OR (Standard Order)
8. Set: Delivery Type = LF, Billing Type = F2, Check Credit = D (Automatic Credit Check)
9. Define Item Categories: TAN (Standard Item), TANN (Free-of-Charge), RENN (Returns)
10. Define Schedule Line Categories: CP (Standard – MRP relevant), CN (No MRP)

8.3 Pricing Procedure Configuration (Condition Technique)

11. SPRO → SD → Basic Functions → Pricing → Pricing Control → Define Condition Types → PR00, K007, HD00, MWST
12. Define Access Sequences for each condition type
13. Create Pricing Procedure: RVAA01 → Add conditions in sequence with step numbers
14. Define Pricing Procedure Determination: Link Sales Area + Customer Pricing Proc. + Document Pricing Proc. → RVAA01

8.4 Output Determination (Invoice Print)

15. SPRO → SD → Basic Functions → Output Control → Output Types → Define output type RD00 (Invoice Output)
16. Assign print program RVADIN01, form MEDRUCK
17. Configure output determination procedure and assign to billing document type F2

8.5 Shipping Configuration

18. SPRO → Logistics Execution → Shipping → Basic Shipping Functions → Shipping Points → Define Shipping Point NM01-SP1
19. Assign Shipping Point to Plant NM10
20. Define Delivery Types: LF (Outbound), LR (Returns Delivery)
21. Define Routes: Route NM10-BBSR (Bhubaneswar Local), NM10-DEL (Delhi Long Haul)

8.6 Account Determination (SD – FI Integration)

22. SPRO → SD → Basic Functions → Account Assignment/Costing → Revenue Account Determination → Define and Assign Account Determination Procedures
23. Assign Account Key ERL (Revenue) → GL 800000
24. Assign Account Key ERS (Cost of Sales) → GL 300000
25. Assign Account Key MWS (Tax) → GL 220000

9. SAP Transaction Codes (T-Codes)

The following table lists all key transaction codes used in the NovaMart O2C process implementation:

T-Code	Module	Description
VA11	SD	Create Inquiry – Capture customer's initial interest
VA12	SD	Change Inquiry
VA13	SD	Display Inquiry
VA21	SD	Create Quotation – Formal price offer to customer
VA22	SD	Change Quotation
VA23	SD	Display Quotation
VA01	SD	Create Sales Order – Core O2C document
VA02	SD	Change Sales Order
VA03	SD	Display Sales Order
VA05	SD	List of Sales Orders – Reporting
VL01N	SD	Create Outbound Delivery with reference to Sales Order
VL02N	SD	Change Outbound Delivery – Picking, Packing, Post Goods Issue
VL03N	SD	Display Outbound Delivery
VF01	SD	Create Billing Document (Invoice)
VF02	SD	Change Billing Document
VF03	SD	Display Billing Document
VF04	SD	Billing Due List – Process pending billing documents
VF05	SD	List of Billing Documents
F-28	FI	Post Incoming Payment from Customer
F-32	FI	Clear Customer Open Items (AR Clearing)
FD32	FI	Maintain Customer Credit Limit
FD33	FI	Display Customer Credit Limit / Credit Exposure
XD01	FI/SD	Create Customer Master (All Views)
XD02	FI/SD	Change Customer Master
XD03	FI/SD	Display Customer Master
MM01	MM	Create Material Master
MMBE	MM	Display Stock Overview – Check inventory levels

ME21N	MM	Create Purchase Order (for returns / replenishment)
FS00	FI	Create/Display GL Account Master
VK11	SD	Create Condition Record (Pricing) – e.g., set PR00 price for material
VK12	SD	Change Condition Record
SPRO	ALL	SAP Project Reference Object – Access IMG for configuration
SE11	ABAP	Data Dictionary – view table structures
SE16N	ABAP	Display Table Contents (e.g., VBAK – Sales Order Header)
SM30	Basis	Table Maintenance View

10. SAP Screen Guidance (For Practical / Viva)

Since actual system screenshots cannot be included in this report, the following descriptions explain what each SAP screen looks like and what fields must be filled. This section is critical for viva preparation.

10.1 VA01 – Create Sales Order

- **Initial Screen:** Enter Order Type: OR. Enter Sales Organization: NM01, Distribution Channel: 10, Division: 01. Press Enter.
- **Overview Screen:** The screen has three tabs: Overview, Ordering Party, Shipping. Enter Sold-to Party: CUST-1001, PO Number: SR/2025/0056, PO Date, Requested Delivery Date.
- **Item Overview:** In the items section at the bottom, enter Material: NM-FG-1001, Order Quantity: 50, Unit: CTN. Press Enter – SAP auto-populates plant, pricing, and schedule line.
- **Conditions Tab:** Click on item → Conditions tab. See PR00 (480), K007 (-24), HD00 (+5), MWST (82.98). Net value = 543.98 per CTN.
- **Save:** Press Ctrl+S or click Save. System displays: 'Standard Order 3000001 has been saved.'

10.2 VL01N – Create Outbound Delivery

- **Initial Screen:** Enter Shipping Point: NM01-SP1. Selection Date = Delivery date. Enter Sales Order: 3000001. Press Enter.
- **Delivery Screen:** System copies material and quantity from Sales Order. Check delivery quantity = 50 CTN. Verify Storage Location = SL10.
- **Save:** Save to create Delivery Document 80000001.

10.3 VL02N – Post Goods Issue

- **Open Delivery:** Enter Delivery 80000001. Go to Picking tab.
- **Picking:** Enter Picked Quantity = 50. Save picking.
- **PGI:** Click 'Post Goods Issue' button. System shows: 'Delivery 80000001: Goods issue posted.' Material document and accounting document created automatically.

10.4 VF01 – Create Invoice

- **Initial Screen:** Enter Billing Type: F2 (or leave blank for default). Enter Delivery Number: 80000001. Press Enter.
- **Billing Overview:** System shows billing item with total value = INR 27,199. Verify pricing and tax.
- **Save:** Save to create Billing Document 90000001. FI document auto-generated: Dr. Customer AR | Cr. Revenue | Cr. GST.

10.5 F-28 – Post Incoming Payment

- **Header:** Enter Document Date, Posting Date, Company Code: NM01, Currency: INR, Bank Account: 113000, Amount: 27199.
- **Open Items:** Click 'Process Open Items'. Select open invoice 90000001. Amount assigned = 27199.
- **Post:** Press Post. Document saved. Customer AR balance cleared to zero.

11. Integration with Other SAP Modules

One of SAP's greatest strengths is seamless integration across modules. In NovaMart's O2C process, SAP SD integrates with MM, FI, and CO at multiple touchpoints.

11.1 SD ↔ FI Integration (Most Critical)

Financial postings in SAP FI are triggered automatically at two key points in the O2C process:

O2C Event	Dr. (Debit)	Cr. (Credit)	GL Accounts
Post Goods Issue (PGI)	COGS (300000)	FG Inventory (120000)	Movement Type 601 triggers MM → FI
Billing Document Created	Customer AR (140000)	Revenue (800000) + GST (220000)	Account Key ERL, MWS in pricing
Payment Received (F-28)	Bank (113000)	Customer AR (140000)	Clears open AR line item

11.2 SD ↔ MM Integration

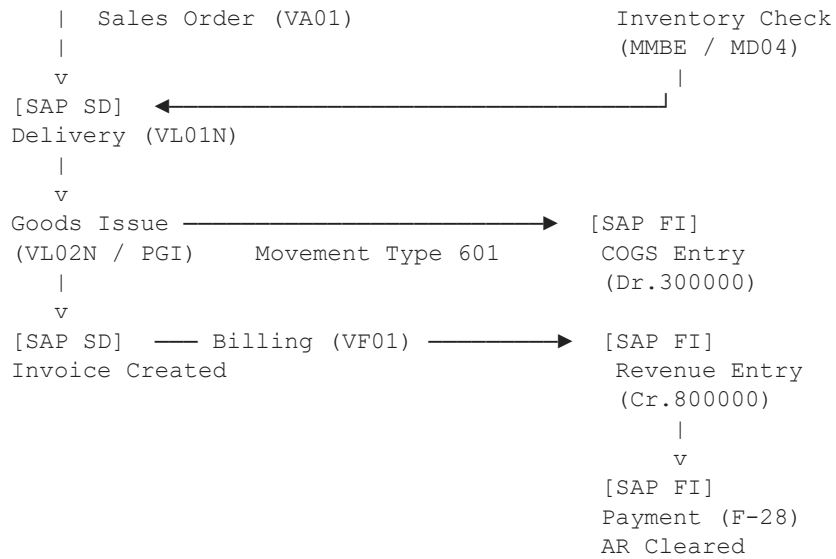

- **Availability to Promise (ATP):** At Sales Order creation (VA01), SAP checks inventory in plant NM10 via MM module. If stock is insufficient, system shows a delivery proposal date.
- **Goods Issue:** PGI (VL02N) reduces physical inventory at Storage Location SL10 using MM Movement Type 601.
- **Material Master Sharing:** Material NM-FG-1001 is maintained in both SD views (sales/delivery) and MM views (MRP, valuation, purchasing).
- **Delivery from Plant:** The delivering plant (NM10) is determined from Material Master and drives the entire warehouse fulfillment.

11.3 SD ↔ CO (Controlling) Integration

- **Revenue Postings:** Billing document triggers CO-PA (Profitability Analysis) entries for profit centre-wise revenue reporting.
- **Cost of Sales:** PGI posting flows into CO for COGS allocation per product/division.
- **Profit Centre:** Material master contains profit centre assignment, enabling Division-wise P&L in NovaMart.

11.4 Integration Flow Diagram (Text)

12. Challenges & Solutions

#	Challenge	Impact	SAP Solution
1	Resistance from sales team to adopt new system	Delayed go-live, low data entry quality	SAP Fiori UI – intuitive mobile-friendly interface. Role-based training workshops.
2	Data migration from legacy Excel to SAP	Incorrect customer/material master data causing transaction failures	LSMW / BAPI tools for bulk data upload. Data validation scripts run before cutover.
3	Pricing inconsistency across regions	Revenue leakage, customer disputes	SAP Condition Technique with access sequences ensures automatic, consistent pricing.
4	Credit limit management	Bad debts from high-risk distributors	SAP credit management (FD32) with automatic block on sales orders exceeding credit limit.
5	Inventory mismatch between SAP and physical stock	Wrong ATP results, delivery failures	Cycle counting process in SAP MM (MI01, MI04, MI07) and WM bin management.
6	GST compliance and tax calculation	Penalty from tax authorities for incorrect invoicing	SAP Tax Procedure TAXINN with condition type MWST for automatic GST calculation.
7	Multiple sales order changes causing document flow inconsistency	Billing errors, delivery duplications	SAP document flow (VA03 → Document Flow) shows complete linked document chain.

13. Conclusion

13.1 Benefits Achieved

The successful implementation of SAP SD for the Order-to-Cash process at NovaMart Consumer Goods Pvt. Ltd. has resulted in the following measurable business improvements:

KPI / Benefit	Before SAP	After SAP
Order processing time (per order)	45 minutes	8 minutes
Billing cycle time (order to invoice)	5–7 days	Same day (post PGI)
Pricing error rate	12%	< 0.5%
Customer outstanding AR visibility	Weekly manual report	Real-time (FBL5N)
Order fulfillment accuracy	82%	97%
Credit limit breach incidents	8–10 per month	0 (auto-blocked)

13.2 Learning Outcomes

Through this project, the following technical and functional competencies were developed:

- Thorough understanding of the SAP SD module and its position within the SAP ERP landscape.
- Practical knowledge of O2C process configuration in SPRO — from sales document types to pricing procedures.
- Hands-on experience with key SD T-codes: VA01, VL01N, VL02N, VF01 and FI T-codes: F-28, FD32.
- Understanding of master data in SAP: Customer Master (XD01), Material Master (MM01), and GL Accounts (FS00).
- Knowledge of cross-module integration — how SD triggers MM inventory movements and FI accounting entries.
- Ability to design an organizational structure in SAP that mirrors real-world business hierarchies.
- Problem-solving skills in identifying business pain points and mapping them to SAP functional solutions.

13.3 Future Scope

As Phase 2 of NovaMart's SAP journey, the following enhancements are planned:

- Migration from SAP ECC 6.0 to SAP S/4HANA for real-time analytics and simplified data model.
- Implementation of SAP Fiori apps for mobile sales order creation and delivery tracking.
- Integration of SAP CRM (Customer Relationship Management) for pre-sales pipeline management.
- Implementation of SAP TM (Transportation Management) for route optimization and freight cost tracking.

- Deployment of SAP Analytics Cloud (SAC) for real-time sales dashboards and forecasting.
